There may happily be many more Authors extant who have written of *Astrologie*, but no more have as yet come unto my hands; these I mention are all my own, &c. many of these perhaps have been since printed at other places: Indeed *Ptolomey* hath been printed in *folio*, in *quarto*, in *octavo*, in *sixteens*, and hath been translated severall times out of *Greek* into *Latin*: that lately printed at *Leiden* I conceive to be the most exact, it was performed by *Allatius*, &c. In a word, some may blame me that I write in the *English* tongue; yet I trust I have offended no man, sith I write in my owne Language; and to such as speak as I speak; nor doe I know that it is forbid unto man to write in his owne Language, or is any man bound to read or heare  
that

guage, or is any man bound to read or hear that contenteth him not : If this Book do generally please, I shall account him good, and think him worthy to live : but if he displease, I then believe the memory of it shall soon perish, and my selfe shall count it ill : If notwithstanding this, mine Accusers will not be satisfied with this common judgement, let them content themselves with the judgement of the time, which at length discovereth the privy faults of every thing : which because it is the Father of truth, it gives judgement without passion, and accustometh evermore to pronounce true sentence of the life or death of Writings.
